

T8/T5 LED LINEAR

eiko.com

THE LINE ON LINEAR.

Retrofit your linear fluorescent tubes with EIKO LED tubes and save time and money. EIKO LED linear tubes last 2x longer and use up to 80% less energy.

Upgrading your light source from traditional to LED is made easier by EIKO. LEDs provide lower energy bills and reduced maintenance costs – with additional savings via utility rebates from your energy provider.

EIKO carries a full line of LED linear tubes for any application, including direct fit, line voltage/ballast bypass, hybrid dual mode, and double ended models, in T5, T8, and U-bend.

| | DOUBLE-ENDED (Double-ended line voltage input) | LINE VOLTAGE (Single-Ended Input) | DUAL MODE (Single-ended input) | DIRECT FIT |
|--------------------------------|--|--|---|--|
| FEATURES: | Simple, easy connection to line voltage; works with either shunted or non-shunted tombstone holders | Ballast bypass, must connect directly to line voltage | Plug-and-play; operates on ballast or line voltage | Plug-and-play; uses existing ballast - no rewiring or modifications required |
| REQUIRED MODIFICATIONS: | Non-shunted lamp holders must be shunted with an external jumper. Both pins on each end must be connected to line voltage. | Disconnect ballast; connect line voltage to non-shunted socket | For line voltage operation, disconnect ballast and connect line voltage | None |
| LIFETIME COST: | Best long-term solution. Lowest lifetime cost; simple modifications up-front | Fixture rewiring required before installation | Must rewire fixture when ballast fails | Lowest up-front cost; ballast must be replaced upon original ballast failure |

DLC QUALIFIED

Many of Eiko's LED linear products are DesignLights Consortium® Qualified for high performance and energy efficiency. Products that earn the DLC qualification are often eligible for rebates through various energy efficiency programs.

NSF / ETL SANITATION LISTED

Intertek

All Eiko tubes are either NSF/ANSI Certified or ETL Sanitation Listed to meet industry standards for construction, safety, and performance in areas where sanitation is of the utmost importance.

LED LINEAR PRODUCT LINES

T8 LED DOUBLE-ENDED

Easy-to-install double-end powered line voltage/ballast bypass tubes

- Use with shunted or non-shunted tombstone holders
- Line voltage; no external ballast/driver required
- Suitable for use in totally enclosed fixtures
- 9W-17W; 2'/3'/4' and 8' (single-ended) length
- 3500K/4000K/5000K CCT
- Easy installation; remove ballast and rewire

T8 LED LINE VOLTAGE

No external ballast or driver required; operates on universal 120-277V line voltage

- Single-end powered, solid state replacements for linear fluorescent tubes
- Existing fixture maintains original UL compliance per UL1598C listing
- Suitable for use in totally enclosed fixtures
- 9W-43W; 2'/3'/4' length
- 3500K/4000K/5000K CCT
- U-Bend versions (U6) available

T8 LED DUAL MODE

Hybrid Dual Mode for use with instant start electronic ballasts OR direct line voltage

- Directly replaces linear fluorescent tubes
- 15W; 4' length
- Use with shunted tombstone holders when used as a direct fit lamp with ballast
- Use with non-shunted tombstone holders when using on line voltage
- Suitable for use in totally enclosed fixtures
- 3500K/4000K/5000K CCT

T8 LED DIRECT FIT

“Plug and Play” solutions that work with existing electronic T8 ballasts

- Easy to install; no rewiring or modifications of any kind required
- No socket changes; uses shunted or non-shunted sockets
- Suitable for use in totally enclosed fixtures
- 8W-22W; 2'/3'/4' length
- 3500K/4000K/5000K CCT
- U-Bend versions (U1 & U6) available

T5 LED LINE VOLTAGE

No external ballast or driver required; operates on universal 120-277V line voltage

- Double-end powered
- Existing fixture maintains original UL compliance per UL1598C listing
- Suitable for use in totally enclosed fixtures
- 25W; 4' length
- 3500K/4000K/5000K CCT
- Integral 120-277V drivers provide easy installation

T5 LED DIRECT FIT

“Plug and Play” solutions that work with existing electronic T5 ballasts

- Easy to install; no rewiring or modifications of any kind required
- No socket changes; for use with non-shunted socketed fixtures
- Operates on most popular electronic programmed-start fluorescent T5 ballasts
- 11W-25W; 2'/4' length
- 3500K/4000K/5000K CCT

solutions. service. simplicity.
